

The needs and aspirations of the people who use our services are at the heart of all that we do.

Supporting Daily Living

Rainbow Home Care provides services targeted both to assist an individual's specific needs and designed to enable daily living activities, such as attending programs, cooking or money management.

Our services are designed to fully support the needs of each person, as well as empower them to achieve their hopes and dreams.

Rainbow Home Care has been in service to individuals with developmental disabilities with Regional Centers for over fifteen years through our various programs. Our philosophy remains constant and present in all our programs. We aim to support these individuals in realizing their own potential and provide effective services, which encourages independence in all ADL's.

Independence is about choices!

We believe that with help, most consumers can reach beyond their abilities at work, home, school, and in their communities. In aiding our consumers with their needs we aim to ease adaption to their settings and be able to increase their independence in the areas of their strengths.
